Summary

Software Engineering graduate (ECU, 2026) building full-stack web apps with React/Next.js and FastAPI/.NET. Helped take a state math placement test online for NC colleges, and built and deployed a job-tracking app with CI and a public demo.

Education

East Carolina University Aug 2022 – May 2026
B.S. Software Engineering, Concentration in Mobile/Web Development *Greenville, NC*
- Relevant coursework: Web Development, Database Systems, Cloud Computing, Software Engineering Principles

Projects

NCEMPT-3 – Early Math Placement Test (Capstone) | *.NET, C#, JavaScript, Google Cloud*
- Worked on a 5-person team to move NC EMPT (ncempt.org), a placement test that has served 859,000+ students, from paper to an online platform used by NC community colleges and UNC universities
- Built the proctor pages and routing that let test administrators manage their students' tests during an exam session
- Built downloadable student and teacher score reports generated after each test, so results can go straight to teachers
- Set up the database for student, test and results data behind the .NET backend on Google Cloud

Job Application Tracker – Live Demo | GitHub | *Next.js, FastAPI, PostgreSQL, GitHub Actions*
- Built and deployed a full-stack app (Next.js on Vercel, FastAPI on Render, PostgreSQL on Neon) where users paste a job link to auto-fill the company and role, then drag applications across a pipeline board
- Secured accounts with hashed passwords, required email confirmation and a lockout after 5 failed logins, and blocked private network addresses in the link lookup
- Built branded HTML confirmation and follow-up reminder emails over SMTP, plus search, CSV and calendar export, and response-rate stats
- Set up GitHub Actions CI to run backend tests and a production build on every push, and added a one-click demo with a sample board

Experience

Umiya Dec 2024 – Present
Server *Raleigh, NC*
- Train new staff and support other servers at an all-you-can-eat sushi and hotpot restaurant
- Gave feedback on the design of the restaurant's website, drawing on my web development coursework

Technical Skills

Languages:	Python, JavaScript, TypeScript, C#, SQL
Frontend:	React, Next.js, HTML, CSS
Backend & Data:	FastAPI, .NET, Node.js, REST APIs, PostgreSQL
Cloud & DevOps:	Google Cloud, Vercel, Render, Docker, CI/CD (GitHub Actions), Git
