Summary

Software Engineering graduate (ECU, 2026) building full-stack web apps with React/Next.js and FastAPI/.NET. Built the online version of a state math placement test for NC high schools, and shipped a live job tracker.

Education

East Carolina University Aug 2022 – May 2026
B.S. Software Engineering, Concentration in Mobile/Web Development *Greenville, NC*
- GPA: 3.4/4.0 | Relevant coursework: Web Development, Database Systems, Cloud Computing

Projects

NCEMPT-3 – Math Placement Test (Capstone) | *.NET, C#, JavaScript, GCP* Aug 2025 – May 2026
- On a 5-person team, built the online testing platform to replace the paper exam for NC EMPT (ncempt.org), a state-sponsored math placement test that has served 859,000+ NC high school students over 28 years
- Built the proctor dashboard where test administrators pause and resume an individual student's test by student ID, or pause and resume every active test at once during an emergency
- Built downloadable PDF score reports for students and teachers, generated after each test, showing the student's score and their answer to each question
- Set up the Cloud SQL (PostgreSQL) database environment on Google Cloud that stores student, test and results data for the .NET backend

Job Application Tracker – Live Demo | GitHub | *Next.js, FastAPI, PostgreSQL, GitHub Actions* Oct 2026
- Deployed a full-stack app (Next.js on Vercel, FastAPI on Render, PostgreSQL on Neon) with a 16-endpoint REST API. Users paste a job link to auto-fill the company and role
- Secured logins with scrypt hashing, HttpOnly session cookies, email confirmation and a 5-attempt lockout, and blocked private IPs in link lookups (SSRF)
- Added HTML reminder emails over SMTP, search, CSV and calendar export, and response-rate stats
- Set up GitHub Actions CI to run tests and a production build on every push. Another job seeker now uses it

Experience

Umiya Dec 2024 – Present
Server *Raleigh, NC*
- Handle 9 tables per busy weekend shift, including 3 large parties of 6–8 guests, at a high-volume all-you-can-eat sushi and hotpot restaurant
- Trained 3 new servers and support teammates during peak hours

Technical Skills

Languages:	Python, JavaScript, TypeScript, C#, SQL
Frontend:	React, Next.js, HTML, CSS
Backend & Data:	FastAPI, .NET, Node.js, REST APIs, PostgreSQL
Cloud & DevOps:	Google Cloud, Vercel, Render, Docker, CI/CD (GitHub Actions), Git
AI Tools:	Claude, GitHub Copilot (AI-assisted development, code review and testing)
